

Appointment Management

Each impression counts. Create extraordinary experiences with an intuitive appointment scheduling and check-in solution.

Our solution allows for easy implementation in both single and multi-channel environments while utilizing a tablet or desktop platform. Features like appointment scheduling, self-check-in, employee calendar management and automated reporting all work together to enhance your relationship management skills.

Outlook Integration

Utilize real-time availability of your staff to create a seamless experience for in-person or virtual meetings.

Kiosk & Contactless Check-in

Users can check-in or schedule appointments using a kiosk or personal mobile device. Keep consumers alert about wait times and direct them to appropriate services.

Easy Implementation

Appointment management has never been easier. Onboard new employees at any time in a matter of minutes, across all of your physical locations, call centers, and virtual environments.

Website Widget

Enable consumer appointment scheduling through your website with a customizable embedded widget.

Skills Based Routing

Automatically assign the right representative based on service needs and calendar availability.

Automated Reporting

Support effective manager utilization and oversight by identifying staffing gaps and wait times.
